

Householder planning application for
Single storey rear extension and garage conversion with light tunnel

Parking Provisions

The number of parkings for the dwelling has not been altered due to the proposal. However, we would like to demonstrate that a full size 2.5x5m parking space (which is existing) is still available on the driveway. Please see below extract from the planning application drawings:

The planning portal has requested a parking provision document to be submitted. An enquiry was made with Wokingham Council Planning department. They have advised the system is undergoing some "hiccups", and advised to submit a blank document to override the system.
