Comments:

The Council's Built Heritage Officer has reviewed the submitted information comments as follows:

With regard to the rear windows and exterior doors, the Built Heritage Officer notes that these are located to the rear of the two listed buildings and predominantly relate to later, non-historic 20th-century additions, including the roof dormer. While the proposed aluminium-framed replacements differ in material from the existing timber units, they replicate the overall fenestration pattern and proportions. On this basis, the Officer considers that the impact on the appearance and significance of the designated heritage assets would be neutral, and therefore acceptable.

Regarding the interior doors, the Built Heritage Officer considers the proposed replacements acceptable. It is noted that the historic attic stair door on the first floor of No. 38 Rose Street will be retained and reused as the cupboard door in the front bedroom.

As such, acceptable details have been submitted in relation to Condition 4. This condition is therefore discharged, subject to the works being carried out in accordance with the approved details.
