COMMENTS:

I do not have an objection to the building of the houses but I do object to the house design and look. The significant area of charcoal cladding and single coloured brickwork is totally out of keeping with the overall design and look of houses within the village. There is limited diversity in building materials used or reference to the existing Hurst pallet.

The plan as it currently exists should be refused and more consideration of fitting in with the look and feel of the village should be a priority.
