Comments On Proposal

The proposed detached garage/garden store, as represented by **drawing 1999 – 01 dated February 2026** is proposed within flood zone 2.

We would have no objection to the principle of the development but as drainage details have not been provided, we would **recommend the condition below**:

Conditions & Reasons (if required)

No construction shall take place until details of the existing drainage system have been provided, as well as details of how the proposed extension feeds into the existing drainage system, (or details of a completely new drainage system), demonstrating that flood risk will not increase on or off site. This should be represented on a drainage strategy drawing.

The above details shall be approved in writing by the LPA.

The approved scheme shall be implemented prior to the first occupation of the development and shall be maintained in the approved form for as long as the development remains on the site.

This is to prevent increased flood risk from surface water run-off. Relevant policy: NPPF (2023) Section 14 (Meeting the Challenge of Climate Change, Flooding and Coastal Change), Core Strategy policy CP1 and Managing Development Delivery Local Plan policies CC09 and CC10.
