COMMENTS:

If this development goes forward having space for at least one new local church helps to develop the sense of community for all the new people coming to live in the new houses. Many local churches now put on many community events during the week in their premises. In 1984 I led the team to plant Brookside church on the boundary of Earley and the new Lower Earley development. This church should have been at the local Maiden Lane Centre but the local builder was asking way over the top cost to do the build so we had to make alternative arrangements. To make room for a church at the District Centre and Local centre is good for the community.
