Dear Mr Gatfield

TREE PRESERVATION ORDER NUMBER: 20/1973
APPLICATION NUMBER: 250174
LOCATION: LAND TO THE REAR OF 44 DORSET WAY, WOKINGHAM, RG41 3AL

I am writing to you regarding your application to carry out works to protected tree(s), which was received on the 26 January 2025 and validated on the 27 January 2025.

I can confirm Wokingham Borough Council **consents with conditions**, to the following work being carried out to tree(s) included in the above-mentioned Tree Preservation Orders (TPO):

Approved works to W1 of TPO 20/1973:

T1, Oak:

- Crown lift by approx. 1.5 -2m, selectively thin crown and remove deadwood; remedial work to any splits / cracks found.

Reasons stated for works:

We have consulted a tree surgeon (Richard Gresswell, Gressgardens Treecare) who attended our address (on Thursday 23-1-25) to inspect the tree that this application relates to. He has stated that in his professional opinion the particular oak tree is 'stressed' and would benefit from some work to improve the general oak health of the tree. He has recommended that removal of dead wood, selective thinning and a crown lift and inspection to identify and remedy any splits/cracks noted during this. Attached to this application is a photo annotated with red lines to identify the branches requiring work to improve the overall health, symmetry and balance of the tree. There are a number of dead branches above a garden structure that are included in the dead wood removal referred to above.

The consent is granted subject to the following conditions:

1. The above works must be completed before **09 April 2027** and in the event of the works not being completed by that date, further consent will be required.
2. Work must be carried out in accordance with British Standard 3998 – 2010 'Tree work - Recommendations'. The crown lift must involve the tip reduction of minor tertiary and secondary branch ends only to create some vertical lift of the tree canopy and must avoid the removal of main structural branches and branches in excess of 70mm in diameter back to the main stem. The selective thinning must only involve the removal of dead, significantly decayed and the inferior of crossing/rubbing branches if they are present.
3. Climbing spikes shall not be used whilst undertaking any form of works on living trees, except on trees to be felled.

Reasons for conditions 1-3.....

1. To ensure that our records remain accurate.
2. To ensure the health, safety and visual amenity of the tree(s) and ensure works are undertaken in accordance with recognised arboricultural good practice
3. Spikes can cause extensive long-term damage to trees.

Informative:

If you are aggrieved by any of the conditions attached to your consent, you may appeal to The Planning Inspectorate (PINS). Because of coronavirus (COVID-19), you currently can only make a planning appeal online. You cannot currently apply by post.

For more information go to:

<https://www.gov.uk/government/publications/tree-preservation-order-appeal-form>

Telephone: 0303 444 5570 or e-mail it to: treeandhedgeappeals@planninginspectorate.gov.uk
Your appeal should be received within one month of receipt of this decision or any such longer period as the Planning Inspectorate may allow.

You are advised that this letter is in respect of the **Tree Preservation Order only** and it does not imply that consent would be forthcoming from the owner of the tree(s) or any such other persons from whom consent would be required.

If we can be of any further assistance, please contact the Tree and Landscape Officer via email to: development.control@wokingham.gov.uk

Yours sincerely,

Chris Hannington
Trees and Landscape Team Manager

Please note that your attention is drawn to the following information:

Bird Nesting Season and Presence of Bat Roosts

In accordance with the Wildlife and Countryside Act (1981) and Countryside Rights of Way Act (2000), consideration must be given to the timing and type of tree work operations, to avoid causing disturbance to any nesting birds or bat roosts that may be present within the tree(s).

The Act makes it an offence (subject to exceptions) to intentionally kill, injure, or take, possess, or trade in any wild animal listed, and prohibits interference with places used for shelter or protection, or intentionally disturbing animals occupying such places.

It is advised that all non-urgent major tree work and hedge cutting operations are undertaken at a time to avoid disturbing nesting birds during the breeding season (to which the bird nesting season is considered to be from March to July). Where bats are suspected to be present, it is recommended that advice first be sought from a licenced bat specialist and if appropriate, the relevant licence(s) be obtained before any major tree work or hedge cutting commences.

Forestry Act 1967 and Felling Licences

If it proposed to fell a tree or trees greater than 5 cubic metres or sell more than 2 cubic metres of timber in any calendar quarter, a Felling Licence from the Forestry Authority may be required.

Please note that Felling Licences are not required to remove trees from domestic (residential) gardens. Where you are the landowner of large pieces of land with numerous trees, clarification from the Forestry Commission may be required as to whether a Felling licence is needed.

For more information on Felling Licences, please speak to the Woodland Officer at the Forestry Commission on 01296 696543

Further Information can be found on the Forestry Commission Website:
www.forestry.gov.uk
