COMMENTS:

This application should be rejected for the following reasons :-

1. The extremely close proximity to the Loddon nature reserve and the flood plain.
2. The catastrophic risks of spillage to wide watercourses.
3. The proximity to homes, schools and river supply is a threat to public safety and the environmental integrity of the area.
4. The proposal will dramatically increase the number of heavy vehicle movements on an already busy narrow road. In addition the current site access has only been used for occasional traffic. This dramatic increase in traffic will make the road extremely hazardous as traffic from the site will be entering and exiting the site close to a sharp bend in the road.

This proposal for fuel storage is totally inappropriate in such an environmentally sensitive area and I suggest that it is rejected.
