COMMENTS:

I wish to register my strong objection to this proposed change of use to a fuel oil storage and distribution facility. It is highly inappropriate because of the environmental impact such a facility would have on the neighbouring wildlife reserve. The risk of leakage and contamination and resulting damage to the Loddon nature reserve would be too great. In addition the local road network is inadequate to support so many large lorries moving in and out of the site. Even now, without any additional lorries there are frequent obstructions on this road because of lorries delivering tyres to the neighbouring business. The addition of regular fuel tankers also trying to turn in and out of the site would cause significant obstruction and risk of traffic accidents.

Please reject this application and enable it to be used for something more compatible with village roads and a countryside nature reserve.
