COMMENTS:

We strongly object to waive the restrictions for the said business. The said business is well aware that they are located amidst a residential area. This residential area was expanded in last 10 years with two big new built housing developments. These houses were sold with Help to Buy loans and shared housing plans. Considering the families have invested every penny in these new houses its shocking that a business has been allowed to destroy the communities peace by earth shattering machinery digging the ground and now to make it a 24x7 operations, it feels like the capitalist greed is mocking the families.

The business could build more residential houses instead.
