--------------------------	------	--------------------	---------------

Justification for works:

Photographs attached YES/NO

Findings:

T1, T2, T3 – Scots Pine

All three trees are etiolated and heavily suppressed and in decline.

T4 – Scots Pine

Tree has lost its main leading stem and is of poor form. Heavily suppressed the canopy is weighted to the south over the public highway.

Conclusions:

All four trees are of poor form with very limited longevity. Heavily suppressed, the trees are in decline. Site would benefit from new planting to ensure sustainable tree cover to enhance the street scene long term.

Recommendations:

T1, T2, T3 and T4 – Scots Pine – Fell and grind

Replant with Scots Pine or Silver Birch in the front garden area (Heavy Standards)
