COMMENTS:

Planning Application 251862

As a resident of Reading Road, I strongly object to this application for the following reasons:

1. The extra HGV traffic that will be generated in an already busy residential road.
2. There will be issues getting in and out of the site, especially if there are vehicles going into the site or leaving at the same time. This will cause chaos for other road users and be a real danger for pedestrians.
3. Extra HGV traffic will cause further issues with the bend outside the Tally Ho and over the bridge.
4. The noise and contamination which will potentially be generated by storing and moving waste which this business deals with, will have a negative effect on all the residents nearby.
5. The hours and days of work are totally unreasonable in a residential area.

For these reasons Wokingham District Council must reject this planning application.
