

RSPB Classic nest box

Product description

Simply styled, sturdily made timber nest box. Like all our nest boxes, it's made with thick, FSC® certified timber for insulation with a roof designed to prevent rainwater running down the inside of the box. The 32mm entrance hole makes it suitable for many bird species.

Side opens for easy end-of-season cleaning. UK made.

Installing your nestbox

For secure and stable fixing, there are two hanging tabs attached to the back of the nestbox, one at the top and one at the bottom. These tabs make it quick and easy to securely fix it in place. Screws not supplied.

With a wide range of expertly-designed [bird houses](#) to choose from, you can easily provide a safe, welcoming home in your garden for different wild birds. RSPB Shop also provides advice on where to locate your bird house. Help us give nature a home!

Product ID:R401639

Enjoyed by

- Coal tit
- Blue tit
- Great tit
- House sparrow

Which size nestbox hole for which bird?

25mm - blue tit, coal tit, marsh tit

32mm - great tit, tree sparrow, pied flycatcher, house sparrow, nuthatch, lesser spotted woodpecker. 32mm entry holes can, if you wish, be reduced to 25mm using a nest box plate (R0110).

RSPB nest boxes are made with thick timber and will survive for many years, even without the use of preservatives.

If you do want to protect your nest box further, use a water-based preservative (preferably one that complies with standard EN71 part 3 as safe for children's toys). Such paint/preservative types are clearly marked on the container and are available from DIY stores and hardware shops.

Preservatives should only be applied to the outside of the box. Apply in the winter, when there is a low likelihood of occupancy. This will allow time for any remaining volatile components to evaporate.

For more information about siting a nest box please see the Advice section of the main RSPB website.
