COMMENTS:

I totally object to this site being granted 24/7 access. Viscount way is a route used by children going to and from school. The lorries park all along that road restricting vision and space. They drive very quickly along Viscount Way and with the restricted view it's an accident waiting to happen. The noise pollution from the units having 24/7 access will have a huge impact on the residents surrounding homes. The rumbling of heavy goods vehicles will impact on peoples homes-many people already have cracks which will worsen over time. Both units should have restrictions as there is the risk that the times will be abused as they could use the 24/7 unit. How will this impact the value of our homes? How will the speeds of the vehicles be monitored? How will the HGVs be monitored and deterred from using Gemini Road?
