COMMENTS:

The size and design of this application is in no way keeping the theme of the road as gough cooper houses. The property sits between two low level bungalows and will have a detrimental effect to the view of trees and landscape from our property.
The impact and time taken for such a project will hugely impact the road access and constant construction traffic.
Bungalows are a key necessity for less able people and you are limiting availability of such housing in the street and borough. I strongly oppose to the constant development in Earley and the change in housing structures which are not in keeping with this area.
