COMMENTS:

I object to this revised application for the reasons previously stated. The reduction in number of houses to 38 has no impact on the sustainability of the site for new development. Previous concerns including but not limited to, infrastructure, traffic, environment, quality of life and local amenities have not been addressed by the revised application. For example, moving the development to the north of the site still impacts infrastructure, traffic and amenities. The appearance of the houses also is not in keeping with the other dwellings in the village. They resemble the houses already being provided in Arborfield and Gorse Ride (where the parish has already met the requirement for affordable housing). This site is unsuitable for a housing development and the application should be rejected.
