COMMENTS:

There are already over 1,000 homes built or approved nearby, and the area is struggling to cope with the level of development already in place.

Roads are heavily congested, local GP surgeries, schools, and dentists are under pressure, and the existing infrastructure is not sufficient to support further expansion. Additional housing would only increase these problems and reduce the quality of life for current residents.

Without major improvements to roads, public services, and local facilities, this development should not be approved.
