COMMENTS:

Corvus Learning Trust is concerned about the impact that this building process on the Oaklands Schools, particularly the Infants School. We think that timings of deliveries and major building traffic should not be allowed during opening and closing times of the schools. The walkway access to Oaklands Infants School and Acorns Nursery is very busy and we would hope that noise and dust is prevented. Education is important for our young people and we would be mindful of noise and dust pollution particularly during play times when the children are outside. The addition of a new drop kerb right by the side of the walkway also causes concern for us . We had a neighbour on the other side (last spring/summer) with a lot of building work to their house and they are a little further away from the pedestrian walkway but there were constant problems with deliveries or contractors backing out of this house when the children were being dropped off or collected. I did contact the building company several times and they promised each time to avoid these times but then did not. We had near misses with children close to being knocked down. We also had a lot of parental complaints about this too. I do hope this can be considered appropriately
