COMMENTS:

The area is in need of another primary school. If the children of Croft gardens and shinfield can attend a school on the estate then that would cut traffic down as it would be walkable for most. If two schools cannot provide enough spaces then a third is needed but also those children will leave school needing a secondary school which also needs to be thought about. I personally don't have children of school age but recognise the need as so many children on the estate seem to have been given places further afield which requires driving to get them there and back. The surrounding road in and out needs to be

looked at from a safety aspect and how the cars would get in and out of the site safely. The people living on fullbrook and adjacent roads will not want people parking and blocking driveways etc so that needs to be considered also.

On the whole I am in favour of the school which we knew when we bought our house was planned to go there.
