COMMENTS:

I support the idea of needing new schools, however there needs to be a serious consideration to the road use. The roads need widening to 2 lanes so not one way, address the potential for parent parking on the surrounding roads which is already an issue with Oakbank and these schools will be very close, doubling issues. The road through the Croft garden estate is also very busy in the mornings with through traffic and this would worsen that issue. We would NEED speed bumps and traffic calming installed on the main through road Fullbrook Avenue as it's already a significant risk to pedestrians with awful speeding and with young children walking to school this risk would need addressing also. I reiterate my support for another very much needed school, secondary schools are also desperately needed, however infrastructure to support the traffic, parking, and already present danger of speeding on the roads needs addressing FIRST.
