COMMENTS:

I object to the proposal. Having lived on the development for over 5 years I have seen such an increase in the volume of traffic and cars, dangerous parking through Hyde End Lane and Fullbrook Avenue, especially with the addition of a football field. As Croft Gardens is a thoroughfare cars, delivery lorries drive at unsafe speeds and park callously, this is already a major concern of mine with young children and pets. One of the reasons buying here was to live in a safe place for children to play, building a primary school would bring a whole new volume of traffic, more hazardous parking and would be a big health and safety issue to all the residents. In the surrounding area of Ryeish Lane, Moor Close, Shipridge Drive, there has been a restoration of the local wildlife, you often see deer, rabbits, bats, hear many birds, this would be very detrimental to nature, surely the council should be promoting the restoration of green space rather than further destroying it. This is what we want for our young people. With a young daughter, I am aware of many local primary schools, The Coombes at Arborfield Cross, very local, still accepting nursery, reception school places in September, we have many local primary school's Aldergrove, Farley Hill, Lambs Lane, Shinfield Infants, to name a few, along with a new special needs school being built on the old Farley Hill site. Furthermore the proposed school is extremely near many residential properties this would cause a constant noise disturbance, surely another site would be more appropriate. Therefore I object to the proposed school development and hope the council think carefully about use of the site for something safer, more useful for the community and safe for the environment.
