COMMENTS:

As much as I don't want to see yet more housing in an area that is becoming very heavily populated, from what I understand the additional housing is so Cala can fund and deliver the sports facilities rather than the council. The sports facilities will be a very positive addition to the area and I have more confidence in Cala delivering them than the council, so on this basis I support this application. I would add in terms of the pump track, please take influence from what is at Edenbrook Country Park. This is an amazing facility and well designed pump track and it would be great to see something of that standard.
