COMMENTS:

This needs to stop. We are overwhelmed with all the building which is ALREADY Approved, our water, road networks etc cannot and will definite NOT cope with this new development. Take this summer, hosepipe ban because our water companies don't have the infrastructure to cope with all of the new homes using the allocation. We need to STOP building until our networks and infrastructure can be brought up to code! We are losing too much by way of trees which is needed for our environment and pollution, but also our wildlife. We already have so many endangered species such as the field mouse and hedgehogs, that our council, needs to take stock and REFUSE this application.
