COMMENTS:

Increasing the footway this will make it harder to our delivery driver to pass through parked cars on either side, this will narrow the carriageway when large HGV park, causing difficulties for other road users to pass. We had few complaints already regarding delivery drivers safety as there isn't enough parking. Having this increase on footway will make it difficult and without these delivery to the shop we won't be able to run this community business which a lot of elderly people use and this will make it harder for them to park.
