Hi Sandra,

Sorry for the delay I haven't been in the office this week

We will be digging a 400mm deep trench around 400m wide along the side of the garden. The pipework will then run in the corner of the kitchen/dining into utility. Pipework will then rise into the first floor cupboard.

In the trench we will be install insulated copper refrigeration pipework that will be ducted. This will connect the outdoor ASHP to the indoor unit which will be located within the airing cupboard on the first floor.

Within the same trench we will be installing armoured cabling for the power supply to the ASHP.

If you needed anything else please let me know and I will do my best to help

I look forward to hearing from you

Many Thanks
