COMMENTS:

The impact to the entire surrounding area, including Earley, especially whilst the project / construction takes place would be huge. The Arborfield area is already hugely developed with housing and science park / studios. I am not convinced that the infrastructure suggested will be in place before the housing is occupied and the whole area is already at bursting point (e.g. surgery overrun). What is actually required is not more housing but better services so I support the new schools etc but not the new housing.
