COMMENTS:

The proposed primary school meets the urgent need of this local area for further school places at the primary level, as local schools are oversubscribed. Lots of families with young children had a very stressful year when finding out that kids weren't accepted at local primary schools.

A primary school on this site was part of the original plans for Taylor Wimpey's development of the Croft Gardens site, which it promised to residents when selling houses on the development. I moved here in 2018, and now 6 years after still no primary school build. I support this proposal and the benefits this primary school will bring to the whole community.
