COMMENTS:

I am not against the school as I believe this was always the plan and the recent "path to nowhere" has reminded WBC of the commitments. Reading the comments there is also a need by other residents.

However if am really disappointed that there has been no research done on the traffic issues, there are pages and pages about different brick types and noiselevels for the school, yet there is half a page that talks about transport and that just lists the closest stations.

Something needs to be done as having the school will bring an influx of cars to the ryeish lane , Hyde end lane , shipridge drive.

Why can't the entrance and exit of the school be at the corner of ryeish lane and Hyde end Lane but also building an access path for local residents and their children from fullbrook avenue or the walkway behind shipridge drive.

It would mean a lot of unnecessary traffic won't need to come in and out of the estate which already has a lot of bad traffic and undisciplined parking, including many who park at the junction of shipridge and fullbrook.
