Dear Mr Harrison

PROPOSED ERECTION OF 3G EQUIPMENT CABIN ON ROOF TOP AT SIBLEY HALL REDHATCH DRIVE EARLEY

I refer to the above application and your letter of 20th January 2002.

The proposal was not one for planning permission but a submission, which fell to be considered under what are known as the 'prior approval procedures'. This means that the principle of the development is permitted by Government regulations and the only issues before the Council were the siting and the design of the installation in terms of its positioning on the building. Having regard to the roof top location and the presence of other equipment it was not considered that the installation would be detrimental to visual amenity/have an un-due impact on the appearance and character of the area.

I do note that a number of objections to the proposals were received from local residents and I can assure you that these were considered as part of the determination of this application. Having regard though to the Governments presumption in favour of allowing such installations and the equipments siting these were not in themselves grounds on which an objection to the proposals could have been substantiated.

You raise the issue of health effects of such proposals. The Governments position is that it is for the operator to confirm the situation in this respect when submitting their application. Providing that the installation complies with the public exposure guidelines of the International Commission on Non – Ionising Radiation Protection (ICNIRP) the Council are not in a position to question the safety of the proposal. This has in fact been made eminently clear in a couple of recent appeal cases within the District where costs have now been awarded against the Council due to its attempt to use health concerns as part of its reasons for the refusal of Telecommunications development.

With respect to your final point about a possible appeal against this decision, the only rights of appeal that exist within the Planning system are for the applicant, there are I am afraid no third party rights of appeal.

I hope that this clarifies the position on this matter.

Yours sincerely

TREVOR WATSON
Development Control Manager

Dear Mr Watson,

Proposal: Proposed erection of 3G Equipment Cabin on rooftop
Location: Sibley Hall, Redhatch Drive, Earley

In May I sent a letter objecting to this particular proposal as I believe did a number of occupants in Somerton Gardens. Unfortunately I have recently received a letter from yourself informing me that the proposal had been approved.

I find this very difficult to believe on several counts, namely:-

- The occupants of Somerton Gardens who will be affected by this proposal had objected
- This is a Commercial Development in a residential area for which I believe no previous application for change of use was agreed
- The effects of this type of equipment on peoples health is currently unknown and needs more research

No answers have been given to the reasons put forward by myself and others in objecting this proposal so on what basis can it be passed? Is there anyway I can appeal against this decision?

As I have said in my previous letters, I would invite the members of the planning committee to visit our property to see for themselves the affects the proposed development will have for ourselves and our neighbours.

Yours sincerely,

John Hamson

Ref: TL/2001/3824 - Sibly Hall, Reading Univ.
Proposed erection of 3G Eg. Cabin - BT Cellnet

We wish to strongly object to the above planning application. Over the last few years you have allowed antennae, microwave dishes & aerials to be erected to the detriment of local residents.
We believe that adverse effects are being felt on our health due to electro-magnetic emissions, and we are now experiencing severe interference with television reception, We feel there is already too many of this type of equipment too near to houses, enough is enough.
Please refer to my recent tele/conv. with Mr. Mike Thorpe, regarding television & radio interference, and since speaking with him, have spoken to other people affected in other roads around Sibly Hall, I would appreciate a reply of the outcome & suggest the telecommunication companies should test for this reception problem.

Date: 03 May 2001

Proposed erection of 3G equipment cabin on rooftop of hall

University of Reading, Sibley Hall, Redhatch Drive, Earley

These proposals have been evaluated and I have no environmental health objections to planning consent but have the following comments to make in relation to this proposal:

There have been questions raised as to the possibility of adverse health effects from electromagnetic radiation from telecommunication base stations and their positioning in relation to residential development and, in particular schools.

The Chartered Institute of Environmental Healths current policy states that;

(a) despite a growing body of research, there is currently no convincing evidence that environmental exposure to electromagnetic fields (emf) generated by the transmission of electricity or mobile telephony is harmful to human health, including that of children;
(b) that there is no justification on health grounds for restricting the public use of land other than immediately around power and mobile telecommunications installations. Conversely, there is no justification for restricting the siting of such installations in proximity to other land uses:
(c) that public concerns about the effects of electromagnetic fields while in our current state of knowledge apparently without foundation, should nonetheless be recognised as genuine.
(d) the full effects of emfs on humans may not yet be realised and though it can never be conclusive, there remains a need for continuing, properly funded, independent research into the nature, extent and relevance of those effects and the consequent adequacy of prevailing exposure guidelines.

SMcLaughlin.

Latest Consultation Date/Site Notice Expiry Date : 26/05/2001

This application <u>will have expired on</u>: <u>28/05/2001.</u> You need to make a decision 1 day prior to this date for this application to count as determined in less than 8 weeks.

Consultation Responses :

3 neighbours. object - perceived health risks and visual amenity.

Planning Issues :

Effect on street scene & neighbouring properties.

Identified settlement.

Application Number: TL/2001/3824

Appraisal :

This application is for the erection of a 3G equipment cabin. There are already masts and equipment cabins on this site. This particular cabin is to provide storage for upgraded equipment. Some impact of masts & cabins has already been established. The cabin would be 3.7m in width, 2.6m in depth and 2.5m in height. The structure is not considered to be of sufficient size to warrant a refusal. The cabin is set on the roof of the building & is set back from the ~~[illegible]~~ boundary of the site by 60m and, therefore only impact on the street scene will be minimised.

Recomendation : Approval: ☑ **Refusal:** ☐

Dear Sir,

re: Planning Application No: TL/2001/3824
Proposed installation of 3G equipment cabin and 3 antennae on roof of building - Sibly Hall, Redhatch Drive

We refer to the above application and comment as follows:
As far as we are aware, as long time residents of Redhatch Drive, the existing aerials etc. were not the subject of a Planning Application at the time, and were erected without reference to the local residents. We welcome the change in procedure which allows us the opportunity to state our views, as follows.

1) There is already a large assortment of cabins and antennae on Sibly Hall roof, in a highly visible location, and we object to the proposed further proliferation of these unsightly structures. Should the present application be allowed there would no doubt be further applications which it would then be difficult to resist.

2) Our main objection relates to the possible long term health risk resulting from the radiation from the aerials, about which there is much public discussion. We note it is stated that the radiation intensity from the aerials conforms to approved Government guidelines and we read that '...there is no general risk to health of people living near to base stations...' ('Mobile Phones, Base Stations and Health,' Dept. of Health, 2000). However, there is a strong body of scientific opinion which regards these guidelines as seriously flawed (eg 'The Existing Microwave Safety Guidelines are Inadequate', by Dr.G. Hyland, University of Warwick and International Institute of Biophysics), which suggests that this confidence may be misplaced. The debate continues, but it is noted that if the same degree of concern and uncertainty applied to the safety of food or a new drug it is most likely that they would be banned (eg beef on the bone), or would not be licensed.

In the present instance we note that no additional aerials are proposed. However, the Application makes no mention of whether use of the existing aerials in connection with the '3G' system will involve any increase in the level of radiation. If this does occur then we feel that in the interests of the health of the population in the surrounding area the Council should examine the health implications very seriously. We trust that the Council is fully aware of the issues involved.

We note that the Guidelines restrict the radiation intensity to levels which do not cause damaging heating in human tissue (eg the brain) but do not address non-thermal effects due to frequency. It is held that these have the potential to cause cancer, affect the neurological development of children or have other damaging effects even at much lower intensity levels.

While exposure to radiation from mobile phones can be voluntarily restricted, those who like ourselves live in the immediate vicinity of masts (not to mention the residents of Sibly Hall) are exposed involuntarily for 24 hours per day to an unknown hazard. We were not given opportunity to comment on the existing installations, which we would like to see removed, and we object most strongly to any further masts being erected.

We note that because of the risks certain countries, USA, Australia, New Zealand, Sweden, do not allow mobile phone masts within 500 metres of houses or schools.

In considering this Application, as well as taking account of the unsightly nature of the proposed installation, we trust that the Council will adopt a precautionary approach in view of the health risk, and reject the present proposals.

We should be grateful if you would inform us of the Council's decision in due course.

Yours faithfully,

Stella P. Jackson

Dear Ms.Miller,
I am led to believe that BT has made an application to site a new equipment cabin on Sibley Hall, application number TL/2001/3824.
I am of the opinion that this is not acceptable in a residential area as I presume the cabin will house telecommunications equipment which should not be placed near a residential area such as ours. In BT's application they have to declare if they intend to site near peoples homes and they have declined to state how close the equipment cabin is to residences.
I would be very wary considering the doubt about radiation effects on people from mobile phones. I refer you to the recent article in the Daily mail (7th March) about the cancer cases that have occurred in Gainsborough around a water tower housing cell phone transmitters.
Could you reply and let me know what is going on as I feel this attempt should be delayed until there is proof positive the there will be no ill effects due to this proposal.

Yours sincerely,

Colin Reid.

Dear Mr Miller,

re Application No
TL/2001/3824
Proposed erection of 3G equipment cabin on rooftop of Sibley Halls, UoR

In response to your letter of 2nd May 2001, I am very concerned about the proposal. There are already fears about the transmission of electromagnetic radiation from existing antennae on Sibley Halls roof. This proposal should be rejected as it goes the way of more antennae being installed, as well as the cabin being an eyesore to local people.

I hope the Council will take the real concerns and fears of residents of Somerton Gardens into account and turn down the application.

Yours sincerely Trevor Randall

FROM: Joss Miller

DATE: 02 May 2001

DELEGATED

EARLEY TOWN CONSULTATION SHEET

Application Number: TL/2001/3824

Proposal: Proposed erection of 3G equipment cabin on rooftop of hall..

Site Address: University Of Reading Sibley Hall, Redhatch Drive, Earley, Reading.

Applicant: Bt Cellnet C/O G P N Aquisition.

Your observations are required in respect of this application **by 26/05/2001** .

Although Councillors were pleased to note that this proposal was not suggesting the installation of a further telecommunications mast on the roof of Sibly Hall, the Planning Committee still considered that this application should be refused.

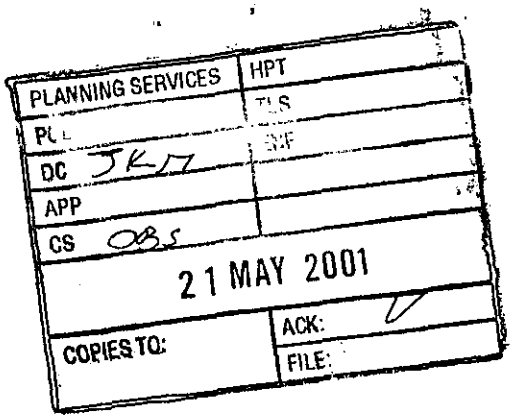

The skyline of the Sibly Hall is already cluttered with numerous pieces of telecommunications equipment, and the installation of further equipment would only lead to increasing this cluttered appearance, which it was considered was of detriment to the street scene and unneighbourly.

For the Attention of Ms Joss Miller

Dear Sirs,

Application Number: **TL/2001/3824**
Site Address: **University of Reading Sibley Hall, Redhatch Drive, Earley, Reading.**
Proposal: **Proposed erection of 3G equipment cabin on the rooftop of hall.**

Thank you for the letter on this subject from John Mitchell.

We object to this proposal. We already have radio transmitters on the roof of Sibley Hall which are drenching us with electromagnetic radiation 24 hrs a day and we do not want more.

We note that this new application is for the equipment cabin only, and no mention is made of antennas. The equipment will not function without antennas. This means that the applicant has already installed antennas, or intends to install them after installing the cabin. Whichever way the system will eventually radiate on the new 3G frequencies and this we object to.

In fact we want to see the removal of all the existing transmitters and antennas as we regard them as an eyesore and a hazard to health. The existence of the radio equipment with its consequent radiation is a violation of our human rights.

We regard the radio equipment activities on the roof of Sibley Hall as a Commercial Development, and it should not be allowed in what is exclusively a residential area.

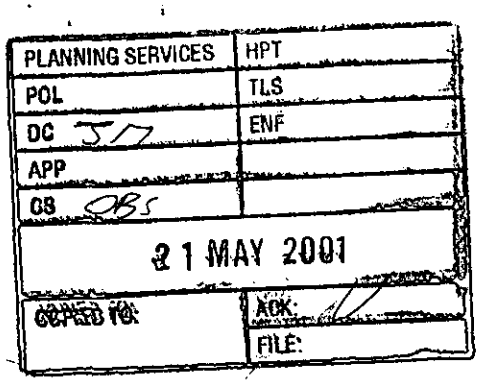

All such equipment, for safety's sake, should be sited in open countryside on proper masts and well away from houses, schools, hospitals and residences like Sibley Hall. We look forward to the law being changed to ensure that this is accomplished.

We ask you to firmly reject the subject application.

Yours faithfully,

M.A.McDonald

Re: Application Number TL2001/3824

Dear Sir

I am writing regarding the above proposal for the erection of telecommunications equipment on the rooftop of Sibley Hall.

Sibley Hall is in the middle of a residential area, surrounded by houses and a school nearby. I am concerned about the possible effect on the health of residents with all the electronic equipment and masts in the area.

The rooftop of Sibley Hall is an eyesore with all the equipment already in place, and it is the rooftop which is clearly visible from all the properties in Sibley Park Rd. I feel that there should be no more telecommunications equipment put on that roof.

yours faithfully

S.P. Thorne

Dear Sir

Application No. TL02001/3824
University of Reading – Sibley Hall, Redhatch Drive.

I am surprised that a further planning application has been made so soon after the previous one for the installation of an equipment cabin on the rooftop of Sibley Hall.

All the objections outlined in my previous letter still apply. Please retrieve this from your records and resubmit it as my objections to this application.

I am deeply concerned that telecom companies are intent on installing their aerials and equipment on students' halls of residence and feel that a wider public debate is now called for.

Yours sincerely

M S Patterson

18 February 2001

Dear Sirs

Planning application TL/2001/3279

We wish to object to the application made to erect more radio antennae and a cabin on the roof of Sibly Hall.

Our objections are:
From a health point of view unknown effects from radiation,
Extension of a commercial development in a residential area,
An unsightly area will be made even worse.

We trust that the Council will turn down this application.

Yours faithfully

Dear Sir

Application Number	TL/2001/3824
Site Address	University of Reading Sibley Hall, Redhatch Drive, Earley
Proposal	Proposed erection of 3G equipment cabin on rooftop of hall.

I wish to strongly object to this proposal.

My objections fall under two areas:

1 The environmental degradation of the area
2 The proven health risk associated with certain broadcast equipment.

The rooftop of this hall is already an eyesore and I have no desire to see any further construction, which I consider to be a blight on my home.

Yours faithfully

C J Hall

Application no. TL/2001/3824

Dear Ms Miller

I write to protest against the above application for a telecommunications equipment cabin on the roof of Sibly Hall, which backs on to our property (and that of numerous other people in the surrounding roads). The grounds for my protest are related to those I gave in response to application no. TL/2001/3824 (my letter of 24 February). I note that this current application makes no mention of antennas. Since BT originally requested both a cabin and antennas, it seems hardly credible that, in the longer term, there is no intention of installing those antennas. I am therefore concerned at the level of honesty implied in the application which is now being submitted through GPN Acquisition..

I am again appalled to discover that, on their application, the company have considered whether the site is near residential property to be "not applicable", demonstrating the disdain with which they treat the application process and the contempt they have for those affected. Are they trying to pretend that the site is not right in the middle of a residential area? What is obviously a commercial development has no place in such an area.

We are already subject to considerable electromagentic radiation from the roof of Sibley Hall, and the assumption that such radiation is entirely harmless has certainly not been proved beyond all reasonable doubt, as you will be aware from the refusal of similar permission in other parts of the country. Regarding the current lack of certainty regarding such devices' harmlessness, I need only mention the case reported on May 7 in the Daily Mail where anm unusual cluster of ten cancers has occurred in Gainsborough in houses surrounding a water tower supporting cell telephone transmitters.

Were such an application to be accepted, I believe on the basis of legal advice that local residents would also have a case both under EU human rights legislation which is now part of UK law, and due to the misuse of Sibly hall roof space under the Town and Country Planning (General Permitted Development) order 1995 particularly regarding the building's appearance.

For these reasons, I oppose this planning application in the strongest possible terms.

Yours sincerely

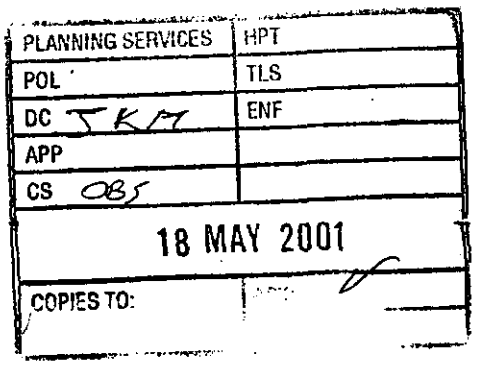

Professor Allan Moore

For the attention of Mr Joss Miller

Dear Sirs

Application No. TL/2001/3824
Sibbley Hall Redhatch Drive Earley

Referring to the above application for the erection of 3G equipment cabin on rooftop of hall I would like to register my objections to the development and ask you to consider the following comments before the application is decided:

1 The application forms part of a larger development of transmitting and receiving antennas and equipment. In addition to the 3G equipment other Code System Operators such as Vodophone, Cellnet, Mercury, Orange, Tele2 and Ionica have installed an excessive amount of equipment. The whole system must be considered to be a substantial commercial development and should not be permitted on a residential building sited in an area designated for residential use.

2 Th visual impact of the excessive number of antennas, cabins, and equipment proposed is detrimental to local amenity is most unsightly and degrades the character of the area. It is noted that it is a condition of the Town and Country Planning (General Permitted Development) Order 1995 that equipment is so sited so as to minimise its effect on the external appearance of the building. No attempt has so far been made to comply with this condition either with screening or by placement of equipment.

3 The cumulative effect of the large number of transmitters may cause radiation health hazard in the adjacent houses, some of which are only 80 metres away from the transmitters. No assurances are given that the acceptable levels of radiation given by the National Radiological Board are not exceeded. It is not a sufficient defence to say that there is no proof that radiation can be harmful. There is equally no proof that radiation is not harmful. What about asbestos! What about smoking!

Yours faithfully

J W Evison

Re: TL/2001/3824. Equipment on Sibley Hall

I am writing to object to this application on the grounds that:
1. It increases an eyesore on the roof of an already ugly building and will have a visual impact on a large number of residents.
2. This equipment should not be sited in a residential area.
3. Our local TV signal provider Metro Cable have told me that such equipment can interfere with TV transmission to their mast in Clevedon Drive.
4. The University has not taken notice of local residents, the equipment would have has no benefit to their role or work, and is purely for commercial profit.

Dear Mr Miller

Application No TL/2001/3824
University of Reading, Sibly Hall, Redhatch Drive, Earley, Reading
Proposal: Proposed Erection of 3G Equipment Cabin on Rooftop of Hall for BT Cellnet

We wish to strongly object to the above planning application on the following grounds:

Over the last few years you have already allowed antennae, microwave dishes and aerials to be erected on the rooftop of Sibly Hall to the detriment of local residents. We believe that adverse affects are being felt on our health due to electro-magnetic emissions and since additional equipment has been installed severe interference has occurred with television reception in the immediate area.

There is already an equipment cabin, four microwave dishes and six sector antennae on the roof for Ionica plc (see enclosed letter), and a telecommunications base station for Tele2 (see enclosed letter).

We would appreciate being informed of the outcome of this planning application with the reasons for or against.

Yours faithfully

B A Clary and M J Clary

For the attention of Joss Miller

Dear Sirs

Planning Application TL/2001/3824, University of Reading Sibley Hall, Redhatch Drive, Earley, Reading

We write to object to the above planning application. The reasons for this decision are summarised below:

1. There has been considerable publicity in recent years as to the potential adverse health effects of mobile phones and the associated transmission network. It is fair to say that the jury is still out. However, in view of other health issues that the public has been offered "reassurance" by "experts" in recent years (BSE, etc) it is right that the public should remain sceptical and wary. Sibley Hall is already bristling with mobile phone equipment which may pose a risk to the public in surrounding houses.
2. Another issue relates to aesthetics. Sibley Hall is a dominant and ugly feature in this area of Earley. We can't object to that *per se* since it was here long before we were but we can object to any application which threatens to make it more visually unattractive.

We understand from some local residents we met at the Council Offices perusing the plans that the last such application to install equipment on Sibley Hall was refused by the Council. This application should also be refused. We shall be very disappointed if you decide otherwise. This is not a strict case of "NIMBYism", we already have enough telecommunications installations on Sibley Hall - enough is enough, we don't want any more.

Yours faithfully

Dr and Mrs P K Bishop

Your Reference:- TL/2001/3824

Dear Planning Officer,

Proposal: Proposed erection of 3G Equipment Cabin on rooftop
Location: Sibley Hall, Redhatch Drive, Earley

I am writing to oppose the above planning application. Our property is located immediately behind the hall and our outlook is directly affected by the building, the top of which has become an ugly hotch potch of aerials and buildings.

The existing aerials etc have been erected, I am not sure if they had planning permission, and have the effect of raising the height of the hall building by two storeys!! As you can imagine this has a big effect on the view from our property which is slightly lower that the hall building itself.

The existing structures, let alone any additions, I feel are totally unacceptable. I am also concerned that this application represents a Commercial Development which is totally unacceptable in a residential area, is this the case?. The development will be very close to the residential properties in this and other roads near us. Additionally I have concerns on the long-term affects the microwave dishes likely to be located in this cabin may have on residents health, have these been investigated?

Finally I would invite the members of the planning committee to visit our property to see for themselves the affects this proposed development would have for ourselves and our neighbours.

Yours sincerely,

J. Harrison

Dear Sir/Madam

Application Number: TL/2001/3824

Site Address: University Of Reading Sibley Hall, Redhatch Drive, Earley, Reading.

Proposal: Proposed erection of 3G equipment cabin on rooftop of hall.

We have been consulted by Bt Cellnet of their intention to carry out the above mentioned telecommunications development.

The application can be viewed at this office from 8.30am to 5.00pm Monday to Thursday and 8.30am to 4.00 Friday or at Woodley Library, Headley Road, Woodley from 9.30am to 7.00pm Monday, Thursday and Friday, 9.30am to 5.00pm Tuesdays and 9.30am to 1.00pm Saturdays. The library is closed all day on Wednesdays. If you are intending to view the details at Woodley Library please allow 3 days from the date of receipt of this letter for the plans to be delivered.

If you have any comments regarding this proposal they must be made in writing and addressed to the case office, **Joss Miller**, quoting application number **TL/2001/3824** & should you have any queries please contact the case officer on **(0118) 974 6463**.

All comments must be received within 21 days of the date of this letter and will be open to public view.

Yours faithfully,

Dear *John Mitchell*

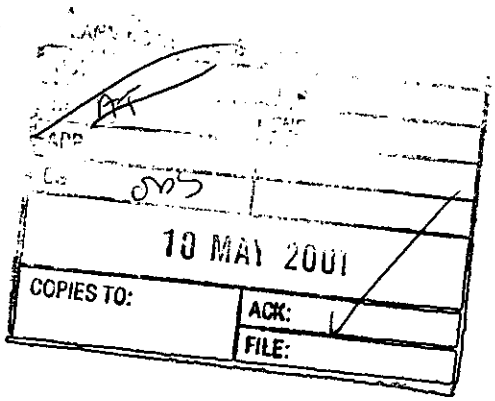

Development Control Manager

My wife and I object to this 3G equipment cabin as it will be in full view of our house and we oppose microwave transmission equipment on health grounds, as not enough research has been done yet into long term effects.

J Gibson.

6th May 2001

Dear Sir

Application Number TL/2001/3824
Sibley Hall

Sibley Hall already has a plethora of communications antennae/cabins/equipment on its roof and is already most unsightly. More importantly, I do feel that there are too many uncertainties regarding health risks to people living in the vicinity of such equipment. I am of the opinion that the application should be refused.

Yours sincerely

R. E Ames

c.c. Earley Town Council

Received by Wokingham District Council

Application No: TL/2001/3824

PROPOSAL:
Proposed erection of 3G equipment cabin on rooftop of hall.

LOCATION:
University Of Reading Sibley Hall, Redhatch Drive, Earley, Reading.

The application is available for inspection at the locations & during the times detailed below:

Dear Sir,

28 Day Prior Approval Application

Ref: Proposed BT Cellnet Installation at Sibly Hall, Redhatch Drive, Earley, Reading, RG6 5QW

I refer to my recent discussion with your planning office with regard to BT Cellnet's proposals for the above address.

On behalf of BT Cellnet, a licensed public telecommunications code system operator, who are proposing to carry out permitted development in accordance with Part 24 of the Town and Country Planning (General Permitted Development) Order 1995 and in accordance with conditions A.2 (4) and (4A) of part 24, we apply for determination as to whether prior approval is required for the siting and appearance of a new BTCellnet 3G equipment cabin as shown on the accompanying location plan and drawings. The following plans are enclosed with this application: 3611/001; 3611/102; 3611/103.

By utilising a rooftop location we are abiding by the Code of Best Practice and PPG8 and we are avoiding the proliferation of masts in the area.

We enclose a cheque for the sum of £35.00 being the appropriate fee.

If you would like to discuss this matter or require further information, please contact me on 01676 525406 or 07730 955294 (mobile number).

Yours faithfully

Miss C. A. Smyth
