COMMENTS:

The parking management plan is inadequate. It says if there are overspill of parking at that point they will consider. We already have sever problems on Tabby Drive, Grazeley Road especially on match day parking. By enforcing parking restrictions by management company on the new development what will happen is all the cars will go into the existing neighbourhood in conveniencing us in three mile cross.

Cars from that side of Grazeley Road cut across to A33 using Tabby Drive as a shortcut. How will this be stopped? I live in the Mitford Field development and we don't want vehicles ratrrunning thorough our estate. What do you propose to stop this happening? I do not see anything stopping it.

The Grazeley road is not enough to support existing houses and the mount of traffic. Why don't you add a road connecting directly to basingstoke road? or A33?

What about additional school places? What about additional GP Dental access?
