I am very supportive of a new primary school, as a young couple we hope to stay local and have children, and we have previously been concerned about school places having seen the difficulty from other parents who cannot get their child into a school within walking/cycling distance. I think this will be beneficial to the community and will (over time) reduce traffic.

More needs to be done to improve the road infrastructure and safety, I strongly support a footpath being developed alongside the one way Ryeish Lane section as this is already very dangerous. Generally the traffic in the Spencer's Wood area is dreadful and improvements should be considered in line with potential short term increases in traffic from Croft gardens.
