COMMENTS:

Ridiculous. Current situation is our close floods in heavy rain due to the drains not coping since the last round of new houses. Roads full, doctors full, schools full. Shops have no parking out front (current) so people park all over the paths. The area cannot sustain another 400+ houses and around 1200 people, 800 cars. It's fine to build new houses but you cannot develop the surrounding roads or housing to make this a safe place to live!
