

We are applying for permission to carry out work on two trees within a tree preservation area

See email below form [REDACTED]

Hello Paul,

Thank you for your enquiry regarding the Oak Tree adjacent to the Wokingham Pony Club steel containers (first photo below).

This tree is a privately owned boundary tree (land Title number BK339903).

The Bridleway (Barkham Bridleway 2) extends inwards from the inner edges of the ditches on both sides of the bridleway.

There appears to be a second tree in a similar condition a short distance away from the Oak, which is also a privately owned boundary tree (BK339903). This tree can be seen in the foreground of the second photo below (Oak next to the containers in the background of the photo).

If you are responsible for the pony club field (BK339903), please can you arrange for the trees to be inspected by an arboriculturist and any recommended safety works organised.

Both trees are situated quite close to the bridleway, which is regularly used by members of the public.

Please be aware that the trees appear to be located within a woodland tree preservation order.

Contact should be made with our Development Control department prior to any possible tree works taking place.

Further information regarding Tree Preservation Orders can be found by accessing the Wokingham Borough Council website www.wokingham.gov.uk

Regards,

[REDACTED]

‘There is a dead oak tree within the boundary of The Coombes that overhangs the containers housing all of the equipment for Wokingham Pony Club. We would like to have the overhanging branches removed to ensure no damage is caused’

Kind Regards,
