COMMENTS:

Regarding the updated Design & Access Statement - essentially, nothing has changed apart from noting that by creating a new access to the property, weight of traffic will be reduced on the Wargrave Road.

Access has always been off of the Wargrave Road and normal amount of residential parking for this property should not make any difference. However, it would transpire that the applicant is anticipating many more vehicles accessing this property and would rather create a dangerous situation in Greenfinch Drive & surrounding than have vehicles drive past his house at no 50.
