PLAN VIEW

ELECTRICITY DUCT POSITIONING

NOTES

- 1 - The main contractor is responsible for all of the signage foundations.
- 2 - Footing position to be decided by main contractor.
- 3 - Cage delivered to site & concreted by others.
- 4 - 2200 x 3000 x 1000mm concrete block foundations by others.
- 5 - Approximately 7m³ concrete required.
- 6 - 5AMP feed required.
- 7 - Approximately 1500mm visible armoured cable left in situ
- 8 - Above level of concrete by others.
- 9 - Groundwork to be made good by main contractor after signage has been fitted.
- 10 - Contractors excavating and installing concrete and stud-cage are responsible for ensuring that foundation block dimensions are followed and that concrete is of a suitable foundation mix.
- 11 - Stud-cage supplied by signage contractor must be set into concrete block as illustrate below.

Armoured cable electrical feed point

Armoured cable to be positioned in centre of concrete block by contractor. Cable to run up centre of base.

1. To be read in conjunction with other consultants drawings.
2. Check site conditions prior to commencement of work.
3. Any discrepancies to be reported directly to the Project Manager.
4. Do not scale off drawing. Use figured dimensions only.
5. All dimensions for existing buildings and openings to be checked on site by contractor.
6. All drawings are the copyright of PEP Project Management Ltd.
