COMMENTS:

As per the our previous objections to the original HMO, this will increase the number of residents living in one house within a small quiet cul de sac. The existing houses within the cul de sac have a total of 17 adults and 4 children to allow one house to have a minimum of 5 people + carers and office managers is going to have a dramatic effect on the makeup of the neighbour hood and the current residents from both a noise and parking perspective. To think of allowing an extension to increase the numbers in one house is unacceptable to us and the current residents. Once we receive the official notification we will respond fully but this is to lodge my initial objection.
