COMMENTS:

One of the properties will be abutting my garden. There is an open trellis fence as the boundary currently with climbers growing up it. The existing building contains asbestos which is a concern during the demolition process.

The build will be only be a couple of metres from the back of my house & so during the build I will have no privacy indoors, be unable to hang washing out. As someone who has anxiety being unable to be in my kitchen or garden (my sanctuary) is a huge worry
