COMMENTS:

I wish to object to the application.

2.2 The applicant states the building has been in commercial use for many years.

As far as I know the site has been visited at most once a month and usually for grass cutting.

2.5 The transport statement claims that the proposed house would reduce traffic movement by 50 percent.

The site is subject to less than 12 movements a year , in my opinion. I am concerned that approving this dwelling will result in a large development, which is not in keeping with the narrow country lane and proximity to the nature reserve,. The land is home to a diverse habitat of wildlife.
