COMMENTS:

Dear Sirs, we were glad when we saw this application to convert a very tired bungalow into a proper family home with granny annex (application 250620. This will improve the look of the whole street and give the new owners something to be proud of.

We were particularly glad to see plans for proper parking provision for 4 vehicles. This has become necessary for family homes in this area, but very rare in new builds and conversions. Rowan Drive is very narrow for the volume of its traffic and on street parking has led to numerous minor collisions involving almost all our neighbours so this provision will be very welcome.

We look forward to rapid completion of the works.
