

COMMENTS:

Reading the comments, there is a concern around how the local infrastructure can't cope with additional homes - I also share those concerns. I am not against new homes going up however it is important that we aren't constantly impacted by the lack of diligence on the impact on our current infrastructure, I ask that if this planning goes ahead that the key infrastructure is made a priority item (utilities, transport, roads) and if required the plans are amended/ delayed to accommodate the infrastructure changes needed to support the additional properties being built - common sense is screaming that the due diligence needs to be in place before, for a successful implementation. Please consider our future neighbourhood, what it will feel like to live in and how will it function?

Thank you,

PLANNING REF : 262061

PROPERTY ADDRESS : N/A

: 00 Eqc, Arborfield Green, Reading, Berks

: RG2 9ZS
