COMMENTS:

Is there a guarantee that putting in this link that the biodiversity and natural wildlife will not be disrupted? A condition should be included that any trees felled are replaced and should not be felled during nesting time.

Does it actually alleviate the traffic flow onto the OWR?

What has been the outcome of discussions between WBC and BFC with regards to the roundabout?

Traffic is like water and will revert to quickest access and exit. It must not be seen and used as a rat-run.
