COMMENTS:

I would like to object for the following reasons.

For the past two years the persistent noise coming from the estate to the rear of my property has been unbearable. I am a type 1 diabetic and it is unhealthy for me to have irregular sleep something that is continually happening as my children were being woken by the previous tenant working until 23.00. As the new hours are intended to be from 7.00 till 23.00 we will have the same issue where the noise will be unbearable and again we will have the same issues of no sleep.

I agree with my neighbour that when the noise test was done was this when the unit was empty or when they had tenants as either noise test would be incorrect as it was a know fact when the previous tests were completed the units were all a lot quieter and sticking to the correct working hours. Also a noise test has been completed by environmental health completed by my neighbour at The Garage and shows the true noise during the evening and early morning hours. We have had continual dealings with Environmental Health, ASB team and Planning regarding the ongoing noise issues coming from this industrial estate.

Working hours have been applied to this site for 40 years and before the new company purchased Heron Industrial Estate we never had any problems. If it isn't broke don't fix it!
