COMMENTS:

Wokingham at present is struggling with its current infrastructure. GP surgeries are at breaking point. Roads are jammed, looking at recent road closures it brought Wokingham to a standstill. Travel to work would normally take me ten minutes after drop the children off at school at present this now takes 40 minutes.

RBH has no capacity at most days, the community hospital is struggling to meet the demands of the community and you now want to add more houses, those house will require access to health and social care, those houses will potentially add more cars on the road.
