COMMENTS:

Prior to the Queens road/Emmbrook development, we were promised a new bus line via

...None materialised.

We were promised a new surgery would be built...to cope with the new intake ..none materialised and local GPs were put under more pressure to see patients and some surgeries are not even taking new patients.

At the time the council promised not to build on Greenfields and this site would be part of the sang opposite.
finally, residents of my road have had to endure several years of noise pollutions in relation to the above developments + the noise & inconvenience of the construction of the new distribution road...so if the application does go through does that mean residents will have to put up with another year of inconvenience of dust/noise pollution...so I object to this application as it will have a big impact on peoples overall well being & less green space in the Embrook area
