COMMENTS:

I wish to object to this application.

It is clearly another attempt to gain access to the field that the developer is determined to cover with houses. There is no point to the changed car park layout, which would no doubt involve removing more trees with existing TPOs. The car park access is on a dangerous bend; more cars would only exacerbate the situation. All the objections in applications 232621, 241556, 231990 remain unchanged.
