COMMENTS:

Last week as I drove into the charvil anglers car park there was a very strong smell of fuel when I got out of my van!  
Obviously already using it for storage!  
Which is very concerning being with yards of lakes, and the river ladden that passes by!  
If there was a leak etc, this would be absolutely devastating not to just the local area, but even further afield as the river will carry this for miles!  
This application cannot go ahead!  
They should relocate somewhere a lot safer for the environment!
