COMMENTS:

Another 79 homes in this area is unsustainable for the local infrastructure. There are no primary schools nearby that can be reached by anything other than car. The doctors surgery is already full. There is no decent public transport - none to Wokingham where local schools would be, and an irregular service to Reading which doesn't even run on a Sunday. The area has already had a significant increase in homes (around 80%) recently and this site is not in the current draft Local plan, and lies outside the village boundaries of Swallowfield anyway This is a rural area, and it seems that no consideration is being given to the impact on the limited infrastructure in place already, and on the environment.
