COMMENTS:

I hope that provision for a church is included in the plans. Quite apart from the fact that many people search for the nearest church when moving, a church provides many services for a local community - toddler groups, mother & baby groups, youth groups and many social activities, while also often offering support within the community in times of crisis - debt counselling, for example. Please make space for a church to be built, as a church often becomes the beating heart of a community, and strengthens community life.
