COMMENTS:

I object the application for the erection of 2x 4 bedroom dwellings due to the impact to the landscape.

A significant number of trees were already felled in the proposed development site, a site that regularly sees rabbits, hedgehogs, owls and bats.

The existing gravel road is also struggling with the traffic from the existing houses - the current residents pool together to fund re-stoning the road. This was already done after 3 years and needs doing again already just one year on with the number of potholes etc that have formed.

With the recent construction of the Spencers Wood Pavillion, I also have concerns as to what the impact of the removal of a further 15 trees would have on the existing houses in terms of noise and light pollution.
