COMMENTS:

I fully support the need for new schools, but the impact on road use must be carefully considered. The roads need to be widened to two lanes to avoid the current one-way traffic issues. Parking for parents on nearby streets is already a problem with Oakbank School, and with these new schools being so close, it will only get worse. The road through the Croft Garden Estate is already very busy in the mornings with through traffic, and this will increase the congestion. We would need speed bumps and other traffic calming measures on Fullbrook

Avenue, as speeding is already a serious risk to pedestrians. With young children walking to school, this is a danger that must be addressed. While I absolutely agree that new schools are necessary especially secondary schools we must first ensure the infrastructure is in place to handle the traffic, parking, and speeding issues already present on the roads.
