

VERIFICATION OF APPLICATION EVIDENCE

Tree Preservation Order Application

Site Address:

16 Field Place
Wokingham
RG41 4EU

Applicant: Chris Hodson

Contractor: High Branch Tree Care

Verification Statement

I confirm that the information submitted in support of this Tree Preservation Order application is true and accurate to the best of my knowledge.

The proposed works relate to five mature Oak trees (T1–T5) situated at the bottom of the rear garden of 16 Field Place, Wokingham, RG41 4EU, as identified on the accompanying sketch plan.

Supporting Evidence

- Site location plan.
- Annotated sketch plan identifying Trees T1–T5.
- Aerial photograph showing the location of the trees.
- Description of the proposed tree works.

Proposed Tree Works

Crown reduction of each Oak by approximately 30%, maintaining the natural shape and appearance of the crowns. Reduce all overextended lateral limbs by approximately 50% back to suitable secondary growth points to reduce end weight and improve crown balance. Remove deadwood exceeding 25 mm diameter where encountered. All works to be carried out in accordance with BS3998:2010 – Tree Work – Recommendations.

Reason for the Proposed Works

Reduce excessive end weight on extended limbs, maintain safe and balanced crown structure, manage the trees in relation to the adjacent residential property and garden, preserve the long-term health and amenity value of the protected Oak trees, and ensure the trees remain appropriate for their location through sympathetic arboricultural management.

Declaration

I certify that this application and the supporting evidence accurately represent the proposed works.

Signed: Harvey belcher

Name: Chris Hodson
